Connectie maken

...

Een paar jaar geleden was het doel helder:

Nederland verdient een succesvolle cybersecurity-beurs.

Natuurlijk zijn er geweldige evenementen zoals de ONE Conference, maar juist de spontane en informele ontmoetingen zijn onmisbaar in een onvoorspelbare wereld. Nieuwe start-ups, vriendschappen, samenwerkingen – dát informele netwerk maakt het verschil.

Met **Cybersec Netherlands** is dat volgens mij gelukt. Beurzen zijn terug. Ontmoeten is terug. Samenwerken is nooit weggeweest, maar voelt urgenter dan ooit.

Trots dat we bij **ESET Nederland** vanaf dag één als hoofdpartner een bijdrage hebben kunnen leveren. Want als je iets doet, doe het goed – een simpele maar wijze businessles. Daarom zetten we elk jaar in op een sterke aanwezigheid: een prachtige stand, gepassioneerde mensen en de ambitie om alle beursclichés weg te blazen. En het lijkt te werken.

Dank voor alle ontmoetingen, complimenten en fijne gesprekken. Op dit soort momenten realiseer je je weer: dit is een mooi land, met een sterke cybersecurity-community.

Met speciale dank aan ons geweldige team op de beurs onder leiding van **Maria Gil Palacios** en natuurlijk alle anderen: **Remy van den Nouweland**, **Michael van der Vaart**, **Tunetta Klap**, **Stef Greijmans**, **Astrid Oosenbrug**, **Romy Tump**, **Fiene de Knecht**, **Berend Oomen**, **Peter Hendriks**, **Patrick Jonker**, **Jake Moore**, **Robin Hoekstra**, **Danny Batenburg**, **Zair van Uytrecht**, **Jamil Sosa**, **Anish Doorga**, **Jacky Greaves**, **Milan Voogt**, **Patricia Smits**, **Harm Teunis**, **Jelle Rozeboom**, **Glenn Verdoorn**, **Guus De Lege**, **Peter Groenewegen**

Tot volgend jaar! (Dan ben ik allebei de dagen erbij, beloofd)

PS: **Koninklijke Jaarbeurs** en alle ketenpartners natuurlijk ook alle lof en dank **Sander Hulsman**

...

Last Thursday, during **Cybersec Netherlands 2025**, we hosted our 3rd CTF in the Benelux region, where over 60 participants from 17 teams hacked away at our web challenges.

Congrats to the winners!
Can't wait for the next one 🍷

On September 10th, 2025, **Luis Moura** and I attended **Cybersec Netherlands**, one of the largest cybersecurity events in the Netherlands, held at the **Koninklijke Jaarbeurs** in Utrecht.

The event showcased a wide range of innovative **#cybersecurity** solutions and offered valuable market **#insights** through various conferences, as well as several **#networking** opportunities with industry leaders.

📝 In this edition, Cybersec Netherlands highlighted the key trends that are shaping the future of cybersecurity, namely, Cybersecurity Strategy, the Human Firewall, Hybrid IT, Data Protection & Privacy, Identity & Access Management, Resilience & Recovery, Compliance & Regulations, Orchestration & Automation, and Operational Technology Security.

Running in parallel, the **Data Expo** Exhibition and Conference focused on the data-driven economy, presenting solutions in data management, business intelligence, artificial intelligence, and market analytics.

For AICEP, it was an excellent opportunity to gain first-hand insights into the latest trends in cybersecurity and data, and to engage with key Dutch and international players.

I attended **Cybersec Netherlands 2025** this week at **Koninklijke Jaarbeurs Utrecht**.
a gathering of CISOs, threat analysts, start-ups, regulators, and innovators shaping the future of cybersecurity.

Key takeaways for me:

- AI is both defence & attack, powering anomaly detection but also phishing and impersonation.
- Identity & Zero Trust are now baseline requirements, especially in OT and critical infrastructure.
- Physical + digital security convergence is a growing challenge.
- Human firewall matters, but must be backed by resilient systems and culture.

Cybersecurity today is multi-dimensional: technology, people, infrastructure, and regulation all intersect.
AI offers great promise, but also demands strong governance, and our "last mile" remains human behaviour and resilience.

...

Last thursday I had a great audience at **Cybersec Netherlands**. I shared 10 years of wins, misses, and scar tissue—hopefully saving a few founders from repeating my mistakes. Thanks for the great crowd!

My main lesson? Most startups fail because they never start. Start, fail, learn & repeat.

I will be sharing the slides of my presentation titled "Innovation theatre won't save us from AI-driven attacks" with those who requested the slides - leave a comment or message me if I missed you.

...

Two consecutive fruitful days, by attending two conferences in the past two days — **Cybersec Netherlands** and **Data Expo**

From strengthening resilience against cyber threats to unlocking the power of data-driven decision making, AI, and governance — these events offered a rich mix of insights.
It was energizing to hear from international keynote speakers and connect with partners and industry peers.
Grateful for the knowledge, conversations, and inspiration and excited to apply these learnings in my day-to-day practice.

Keep exploring. Keep growing.

A full day of OT insights at **Cybersec Netherlands 2025!**

Under the guidance of advisory board member **Marcel Jutte**, the OT Dome & Pavilion brought together professional professionals from industry, manufacturing, energy, water, and transport to explore practical OT security solutions.

Trusted experts **Stedin**, **Uniper**, **aXite Security Tools**, **Kader C&I**, **TNO**, **ICT Group**, **Nationaal Cyber Security Centrum (NCSC-NL)**, **CCV** & **MODELEC** shared insights on legislation, IEC 62443, digital twins, and real-world OT challenges.

Key highlights included:

- ✓ Machines & Cybersecurity – understanding EU Machinery Regulation 2023/1230
- ✓ Digital Twins for OT Resilience – proactive network monitoring
- ✓ OT Cybersecurity in Practice – pragmatic approaches from real-world cases

🗣️ **Marcel Jutte**: "Operational Technology is the backbone of our industries and critical infrastructure. Together with **Security Delta (HSD)**, we have prepared an extensive OT programme at Cybersec Netherlands, bringing experts and professionals together to share knowledge, practical solutions, and lessons learned — helping organisations strengthen OT security before cyber threats become real-world problems."

💡 A day full of knowledge, practical solutions, and inspiration for strengthening OT security!

See you tomorrow at **Cybersec Netherlands!**
